
X2

Environmental Product Profile

100% Recycled Polyester

X2 is composed of 100% recycled polyester, and it's not just recycled, it is one of the first Camira products to include closed loop recycled content, where 25% of the raw material is derived from our own waste, which is upcycled back into yarn and fabric. Life cycle assessment demonstrates that fabrics manufactured from recycled polyester have significantly a lower environmental impact than those manufactured from virgin polyester.

EU Ecolabel Certified

The EU Ecolabel helps you identify products and services that have a reduced environmental impact throughout their life cycle, from the extraction of raw material through to production, use and disposal. Recognised throughout Europe, the EU Ecolabel is a voluntary label promoting environmental excellence which can be trusted.

LEED Credit Contributor

X2 can contribute to the following LEED credits:

LEED v4

- Building product disclosure and optimization - sourcing of raw materials
Option 2 - Leadership extraction practices: recycled content (100% recycled polyester)

LEED v3

- MRc2.2 Sustainable purchasing - furniture (over 20% post-industrial recycled content)
- MRc4 Recycled Content (100% recycled polyester)
- MRc5 Regional Materials (depending on distance of project location)

Information on contribution to other green building schemes is available

GIGA Ranked

'Green Ideas Green Actions' is a tool for architects and designers to choose the most environmentally sensitive materials for their projects.

X2 is a top ranked GIGA material with verified Green Claims:

- Recycled Content

Manufacturing

Manufacturing Location – Huddersfield, United Kingdom

Facility systems – ISO 14001, ISO 9001, OHSAS 18001

0% Waste to landfill
